

Infinity Academies Trust

Ready to learn; Prepared to flourish.

Infinity Teaching Principles

Academies within the Infinity Academies Trust pride themselves on being at the heart of their communities and offering a curriculum that suits and excites their learners. Our academies have very different contexts so we deliberately do not adhere to a one-size fits all curriculum across our Trust. Instead, we are united by our focus on delivering the very best learning experiences for all our children. We do this by ensuring that all our learning opportunities are rooted in the Infinity Teaching Principles. Our expectation is that all staff will know, recognise and use them in their interactions with children every single day.

As staff we commit to the following Infinity Teaching Principles:

- 1. To meet the needs of all our children and enable their independence.***
- 2. To use quality, purposeful dialogue and vocabulary.***
- 3. To ask open and meaningful questions***
- 4. To ensure, through clear modelling, that our children know what they are learning and how to be successful.***
- 5. To provide clear sequences of learning that build on prior knowledge, give children an opportunity to reflect, that values their mistakes and celebrates their work.***

Collectively, we will continue to try to improve our delivery of these principles in our teaching by working together across the Trust to share ideas, provide developmental feedback and revisit our principles through continual professional development on a regular basis.

These principles form the foundation of the exemplary practise that we aim to deliver in every classroom, every day within the Infinity Academies Trust.
