

Reasoning 1

Harpritt has filled in the blanks on this number track.

2	3	6	8	10	11	14	16	17	20
---	---	---	---	----	----	----	----	----	----

What mistake has Harpritt made?
Explain your answer.

What should he have written?

Reasoning 2

When I say the multiples of 2,
I won't say any odd numbers.

Do you agree with Harriet?
Prove it.

Problem Solving

Find all the possible calculations using the clues.

$$2 \times \bigcirc = \square$$

The number in the circle is greater than 3.

The number in the square is less than 24.

Both numbers are even.

The number in the square is a 2-digit number.
