

# Perimeter of a rectangle 2

- 1 A coloured border is 6 m long and it fits around Class 4's noticeboard exactly.

The height of the noticeboard is 1 m.

What is its length?

Complete the bar model to help.

$$\square \div 2 = \square$$

The length of the noticeboard is  $\square$  m.

- 2 Tim has 40 sticks.

He uses all of them to make the outline of a rectangle that is 12 sticks long.

What are the perimeter, length and width of the rectangle?

Perimeter =  $\square$  sticks

Length =  $\square$  sticks

Width =  $\square$  sticks
